

What is claimed is:

- 1 1. A method for directing a game, comprising:  
2 calculating a speed of game play; and  
3 determining an outcome probability based on the speed of game play.
- 1 2. The method of claim 1, in which the step of calculating a speed of game  
2 play comprises:  
3 measuring a number of games in a predetermined time period.
- 1 3. The method of claim 1, in which the step of calculating a speed of game  
2 play comprises:  
3 measuring a time elapsed between a first game and a second game.
- 1 4. The method of claim 3, in which the first game and the second game are  
2 consecutive games of a series of games.
